ISSUE 578 April 2019

PATRON lan Nelson

PRESIDENT Dylan Morrissey

VICE PRESIDENTS Cary Polis Angie Sulfaro

SECRETARY Tinka Riddell tinkariddell@yahoo. com.au 9940 0797

TREASURER Cathy Sinclair

COMMITTEE Guy Cantor Joy Lumby Mark Asbury Tyler Howard

ALL
CORRESPONDENCE
TO – The Secretary,
MWOS Inc., 3 Kristine
Place, Mona Vale,
NSW 2103

NEXT MEMBER'S MEETING Thursday 18th April 2019 at 8pm Cromer Community Centre, Fisher Road North, Cromer.

NEXT COMMITTEE MEETING Thursday 2nd May 2019 at the DYRSL Club at 7.30pm.

MANLY WARRINGAH ORCHID SOCIETY INC.

www.orchidsociety.com.au

PLEASE NOTE THAT THE MEETING IS EARLIER THIS MONTH DUE TO ANZAC DAY FALLING ON THE 4TH THURSDAY.

GUEST SPEAKER. There will be no guest speaker this month but there will be a cultural session.

SUPPER – Thank you to those who brought in something for the supper table last month. This month **Joy & Ralph** will do sandwiches but there is no volunteer for something sweet.

PRESIDENT'S REPORT

امالط

The Auction is fast approaching and wouldn't you know it my highlighter ran out of ink! Perhaps that's a sign I should stop, but alas, I'd rather go without lunch than miss a bargain or something I've had my eye on for a while. As always we will need of help on the day, especially at the end with boxing up plants. And on the subject of boxes, if anyone has some spare they could bring along, or better yet if you could bring some trays if you plan on buying a lot of plants.

As mentioned I have perused the list in some depth and there are definitely some worthwhile things in there. A reminder too, that due to Anzac Day our meeting is a week earlier this month.

I look forward to seeing you all again soon Dylan

AUCTION 14th April. We have 353 lots listed in the catalogue and there are some very nice plants to be had. Help is needed to set up from approx. 7.30am and throughout the day. Growers are requested to have their plants benched before 9am. Growers with Australian natives need to fill in tags to be tied to the plant to comply with Parks & Wildlife regulations. Tags will be available at the hall. Don't forget to bring your own boxes or trays for your purchases.

LIBRARY. The library still operates so please make use of this facility as we have some very good books.

SALES TABLE. We now have pots that were out of stock and also vanda pots. There are pots in all sizes available and also plant labels. You are welcome to bring in your excess plants.

DIARY DATES 2019 April 14th AUCTION

April 18th Members Meeting (Please note this is one week earlier than usual due to Anzac Day falling on the 4th Thursday of the month).

May 17 – 19 Orchids Out West, Richmond Racecourse. Clarendon.

May 23rd Members Meeting

June 13,14,15 Winter Show, Glenrose Shopping Centre

Make a reasonable offer!

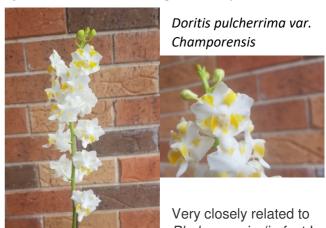

Hybrid Plant of the Evening Grown by A. Sulfaro

Epicattleya Volcano Trick

Epicattleya are a fantastic group of plants, with bright, vibrant flowers that are usually presented in clusters held well above the foliage. The two toned orange of this plant is particularly eye catching, and always stands out really well on the bench.

Specie Plant of the Evening Grown by A . Sulfaro

Very closely related to Phalaenopsis, (in fact I believe it is currently accepted as one) this plant is a peloric form

of the alba variety. Peloric meaning that the two petals mimic the colour and shape of the lip. The main difference between *Doritis* and *Phalaenopsis* is that *Doritis* are terrestrial, whereas *phalaenopsis* are epiphytic. The strong, upright flowering stem is a reflection of this. Of the genus, *pulcherrima* is the most commonly grown.

Novice Plant of the Evening Grown by M. Asbury

Laelia perrinii

Probably one of

my personal favourites of the *Laelia*, *perrinii* isn't nearly as common as *anceps*, *purpurata* or *tenebrosa*, but is just as easy and rewarding to grow. The flowers sit almost horizontal, making the very well presented when shown so the flowers are below eye level. Like many Brazilian species, there are a number of varieties around, and as always, it is worth shopping around to find good quality flowers, or building a collection of the different varieties.

$\label{eq:specimen Plant of the Evening} \mbox{Grown by M \& S.} \\ \mbox{Howard}$

Miltonia William Kirch x flavescens

Miltonia are one of those

plants that really are at their best as specimens, and as a bonus, large plants will often spot flower throughout the year. Made up of 12 species and 8 naturally occuring hybrids (although these numbers have been subject to a lot of change over the years) *Miltonia* are on the whole quite easy to grow here in Sydney without too much special attention, although mealy bugs can be an issue. The best use ive seen them put to when they start to get too large to move around to meetings and shows are in large pots in the garden or on the verandah.

ALAN & MIRIAM'S NEWSLETTER ALAN'S COLUMN APRIL 2019

Over the summer period our plants have had a few fungal problems. Many have sprayed with their favourite fungicide with very little results. This is because if one product does not work you have to use a chemical in another group. If you keep using say SAPROL® and you still have a problem such as spots, rots etc. try a chemical in another group such as ANTRACOL® or PLANTVAX®. I know growers who have only used MANCOZEB for years and now are starting to have problems. In the same group is POLYRAM®, ANTRACOL®, ZINEB®. When I have time I will make out a short list of fungicides to file away. While we are on the subject of fungicides I was recently asked why is PREVICUR® is so good on various fungi. Answer number 1 is that it hangs around in the soil for some time! Last month I mentioned the fact to look at the label on AGRI-FOS products. It could be AGRI-FOS 400 or 600. Most orchid growers these days will buy the weaker concentration at the local chain store or the stronger 400 product 3ml per litre of water BUT firstly read the label or give me a ring! The other day I was reading in a tech bulletin on RHIZOCTONIA and found that AGRI-FOS can help to control this root rot. Note don't forget to add the none ionic wetter to the mix. NOT AN OIL Did you know AGRI-FOS can help to make your plants grow! Helps root growth. It is also safer than Aspirin!

Some interesting info that has come to hand! AGRI-FOS products have been proven to provide effective control of many root type diseases on many ornamental crops. E.g. orchids. In many crops the use of phosphate products has improved plant health . Why Phosphate is both a systemic fungicide and a fertiliser. It has a unique mode of action when it comes to combating root and bulb type diseases e.g. PYTHIUM, PHYTOPHTHORA and certain ERWINIA rots.

FERTILISERS. I get a fair amount of queries on rates to use on certain fertilisers. Peters has their share of problems, One common problem is with PETERS BLOSSOM BOOSTER with a N.P.K of 10+13.1+16.1+2Mg. The rate to use on orchids is 1 gram in one litre of water . PETERS Cal Mag 15+2.2+12.5+5Ca+1.8 Magnesium. The Finisher and Grower are both 1 gram in 1 litre of water.

Watch the pH of the water not too low. The GROWER is used when plants are in active growth, The FINISHER use April through to August CAMPBELL'S YELLOW can be used all the year round. It has a Nitrogen content of 11.8% Phosphorus of 13.2% Potassium 16.6% plus a heap of trace elements. It should commence application in January and continue through to the end of August. RATE; use 20 gram of fertiliser in 7 litres of water. Use every 7 - 14 days. I hope this answers your questions on rates of use on popular fertilisers. MERRI FERT use every 2 – 4 weeks at 1 gram in 1 litre of water. When plant is in active growth. During winter use same rate but apply monthly. During Autumn it is the time to start checking all genera of plants over for pests and diseases. Some plants will have started to show new spikes so apply your friendly snail killer around the top of the pots. While the weather is still warm some attention can be made regarding repotting – potting on etc. If you grow a lot of the Cattleya alliance you can back cut or repot those plants that were back cut last season. Weeding has now become the main issue at the moment. Last month I spoke about the use of SLASHER®. So far it looks like the second application seems to be giving me better results. Let me know how your results have been so far. With the weather we have been having it is a good idea to spray your collection with MANCOZEB at 1gram per litre of water. Two weeks later apply PHOS, ACID at label rate. Keep eyes open for the dreaded beetle, most sprays only slow the birth rate down. As you see your new spikes appearing place a stake beside the oncoming spike so that you do not break it off!! Top dress your plants with Alan's MERRI COTE Use one table spoon per 200ml pot. Watch for wasps I was doing some weeding and then I was invaded by those quick flying monsters. Out with the trusty MORTIEN and down they fell – one by

Before I forget it is a good idea to give all of your miscellaneous orchids an application of seaweed such as SEAWEED SCRETS at 2ml in one litre of water.

KEIKI GROW

Over the years many growers have asked where to obtain Keiki Solutions to apply to Phalaenopsis spikes to get new plant lets. Flora Laboratories have now in stock Keikiroot, Stoproot, Paph Grow Floral Boost and Vitagrow B1 and Vitagrow H. They also list electronic products for your green house etc. for further information contact KEIKI GROW on 03 9584 2087 or email sales@keikigrowplus.com .NOTE: I will not be having our growing class on the 13th April as I will be in hospital. The next class

will be notified in the next Alan's News. Sorry about the change of date. I hope to be able to walk better again soon.

Blue Mountains and Penrith District OS Autumn
Show Open Sat 9am - 5pm Sun 10.30am - 3pm at
Girl Guides Hall cnr Great Western Hwy and
Nepean St EMU PLAINS.
